

SPACE

EMCOR Government Services covers a vast universe of operations and maintenance for NASA's Jet Propulsion Laboratory, as well as other critical space organizations. This is an industry full of surprises, with missions that demand uncommon levels of adaptability and flexibility to ensure success. **We are there, 24/7.**

SPACE

What makes EMCOR Government Services (EGS) a preferred partner is our ultra-specialized, extremely high-reliability expertise in essential services relating to the success of key NASA space programs, including the Mars Rover and other space flight operations that probe and demystify our universe.

Jet Propulsion Laboratory – Pasadena, CA

EGS's responsibility at JPL is to provide base operations support to the 177-acre campus, which consists of 200+ buildings totaling 2.8 million square feet of space. Scope of work includes facilities management, operations and maintenance, repairs, improvements, and oversight of all facilities-related equipment systems and structure. Scope of work also includes grounds maintenance, pest control, janitorial services and fire suppression – as well as energy, environmental, disaster management; and 24/7 operation of critical facilities like the Space Flight Operations Facility.

EGS's use of handheld technology at the campus enables our technicians to receive service calls, perform data entry, make adjustments to the EMS, take and upload photos in the field, reference O&M manuals for specific assets, and research and order materials in real time, especially when time is of the essence.

In order to provide the highest quality services possible, we require that EGS employees stay current with demanded industry practices, and remain fully certified.

EMCOR Government Services engineers are certified in the following disciplines:

- Controls
- Electrical
- Emergency Power
- Energy Management, Audits & Modeling
- LEED
- Mechanical
- Plumbing
- Roof Inspections
- Structural Analysis and Design
- Vertical Transportation

A sampling of EGS facilities solutions:

- Arc-Flash
- Asset Numbering / Barcoding
- Building Commissioning & Retro-commissioning
- Construction Inspections & Document Reviews
- Criticality Assessments
- Design-Build Project Delivery
- Diagnostic & Forensic Engineering
- Due Diligence / Property Transfer Inspections

Boeing Space Coast Facilities – Kennedy Space Center and Cape Canaveral, FL

EGS operates, maintains and repairs several of Boeing's facilities on the Space Coast, including its Commercial Crew and Cargo Processing Facility, the Processing Control Center, three warehouses, and the Commercial Crew Orbiter, where the Crew Space Transportation Space Craft (CST-100 capsule) is being built.

EGS is responsible for mechanical, electrical, and fuel processing equipment; generators; landscaping; and support with light construction work.

EGS draws from a growing nationwide network of highly skilled professionals

29,000+

MISSIONS ACCOMPLISHED

Armstrong Flight Research Center – Edwards Air Force Base, CA

For Armstrong Flight Research Center, EMCOR Government Services developed a quality Reliability Centered Maintenance program and integrated it into NASA's Computerized Maintenance Management System. Additional EGS responsibilities include preventive maintenance services, minor facilities repairs, grounds-keeping services, and janitorial services.
